English

About me

Full Stack Developer with experience in JavaScript, React, Tailwind CSS, Python, FastAPI, PostgreSQL, Docker, and Git/GitHub. Basic knowledge of Cloud technologies and experience deploying web applications. Currently developing full-stack projects, integrating frontend, backend, databases, and REST APIs.

Professional Experience

Content Moderator

March 2024 - Present

Tiktok

- Train and evaluate AI models by annotating and classifying data, helping algorithms learn to understand and perform basic everyday tasks accurately and independently.
- Ensure compliance with platform policies and monetization standards.
- Work in high-volume and fast-paced operational environments

Dispute Agent

Feb 2022 - Feb 2024

Barclays

- Investigated fraud cases and duplicate account disputes.
- Reviewed customer documentation and performed detailed analysis.

Developer

My projects

Jul 2024 - Present

- Developed and maintained full-stack web applications using React, Laravel, JavaScript, Python, PHP, and MySQL.
- Designed and implemented RESTful APIs for backend services, enabling efficient communication between frontend and backend systems.
- Built responsive, mobile-friendly user interfaces using Tailwind CSS and Bootstrap.
- Implemented CRUD operations, form validation, authentication, and database interactions to deliver reliable application functionality.
- Used Git and GitHub for version control, code management, and collaborative development workflows.
